

Compelling Opportunities

Information Systems Intern

Do you consider yourself to be *Extraordinary Talent*?

At Owens Corning, interns are treated exactly like regular employees—you will take on a great deal of responsibility and do impactful work all while engaging in a dynamic learning experience. Interns work side by side with Owens Corning employees as team members and are expected to continuously elevate their performance and the results of the team as a whole. As an intern at Owens Corning you will be encouraged to find innovative ways to achieve results while constantly striving for improvement.

Program Description: The design of the I.S. intern assignment allows the intern to get involved in the IS function in a tangible way and directly impact the success of the business. It may include performing analysis, design, technology application, and release testing/deployment activities associated with the implementation of I.S. products and services. Intern opportunities are typically available within our I.S. Development teams (working directly with SAP, PeopleSoft, SharePoint, and other business applications) and Technology Infrastructure teams (supporting wide/local area networks, application servers, desktop computing, Internet/Intranet, and Voice Systems). The intern may participate in:

- Business process design
- Collection and satisfaction of business requirements for I.S. products and services
 - Mapping and/or configuration of business software to align with processes and requirements
 - Development of system specifications for software customization, data conversions and systems interfaces
 - Development of testing plans, test data and standard reporting; actual system testing
 - End user training and second level systems support
 - Evaluation, justification and acquisition of hardware and software components
 - Operation and support of production, test and training environments
 - Performance monitoring and tuning of production, test, and training environments
 - Development, testing and on-going maintenance of Disaster Recovery Plans
- Establishing and monitoring service level agreements as well as managing vendor and partner relationships

Selection Criteria:

- Creativity
- Customer Driven
- Decision Making
- Elevates Performance
- Self-Knowledge
- Teamwork
- Technical Skills and Knowledge
- Communication

Education: Educational background in Information Systems, Computer Science, or a related Science is required with a 3.0 or greater overall GPA.

Internship Benefits:

- Real work experience with challenging and meaningful assignments
- Networking opportunities and exposure to senior leadership
- Formal and informal personal and professional development activities
- Career exploration
- Project-specific training
- Accountability for work
- Competitive compensation
- Opportunity to evaluate the company for full-time employment
- “Lunch with the Leader” forums
- Intern Group Project work
- Project presentations to senior leadership
- Social events (Toledo Mud Hens baseball games, off-site team building, etc.)
- Subsidized housing

Location of Assignment: World Headquarters in Toledo, Ohio

Information Systems at Owens Corning: Information Systems is at the leading edge of change and helps Owens Corning drive its vision of global growth. The organization is managing for the future with an initiative that has redefined the way we do business. This initiative merges Owens Corning's business processes with a fully integrated technology system. Utilizing SAP as the core business application system, we are providing real-time information accessible worldwide.
